

Leadership

Leadership is the ability of a person or a group of people to influence and guide others to be their best selves. We all have strong leaders in our lives, and they aren't always the people we immediately think of. Leaders aren't just politicians, teachers, or coaches, they can be students like yours!

A good leader inspires people to do their best and helps guide them to achieve their goals. Good leadership can create a vision and can motivate people to make it a reality. The best way to lead is by example because it helps others see their own potential.

Leadership

- Encourage your student to plan out and execute a community service project.
- Have your student create a word map of characteristics that a leader should have. Display it somewhere they will see it daily to help motivate them to embody these qualities.
- Have your child identify someone who they think is a leader, ask them to explain why.
- Have a conversation with your student about how they can inspire others.
